

Ehvert Engineering is a leading provider of engineering, construction and systems integration services for mission critical facilities and data/internet centres. We are looking for experienced electrical and mechanical engineers to work in our downtown Toronto location. Our clients include major North American internet companies, corporations and institutions in the private and public sectors.

The services we provide at Ehvert include Electrical, Mechanical and Security Systems Engineering, Design and Integration, Wireless/Fibre/Cable Infrastructure, IT Infrastructure Design / Implementation, Data Centre Design, Network Design, Carrier Infrastructure Services, Construction Management, Project Management and Technology Relocation.

Ehvert is also working on several environmentally sustainable projects. Ehvert has qualified Leadership in Energy and Environmental Design (LEED) expertise that can be leveraged to provide environmentally friendly and sustainable design solutions. We have the ability to prepare documentation and submissions for LEED certification of buildings, as well as advise clients on how to make a building LEED certifiable and how to operate premises in an energy efficient and environmentally sustainable manner.

Ehvert is looking for engineers with 3-5 years of experience in power systems design or plumbing and HVAC design. You would support senior engineers in their day to day activities including performing site audits, engineering calculations, preparing designs and working drawings using AutoCad. Through the position you will gain exposure to a wide range of engineering activities.

We are looking for dynamic individuals who possess the following skills:

- ability to co-ordinate and plan multiple projects
- excellent communication skills and ability to work in a team environment
- plotting and drafting experience and the ability to use AutoCAD software
- experience within the engineering consulting field, or the construction industry

Please submit your resume and cover letter to careers@ehvert.com.
